Full Stack Developer (.NET Core, D365, Azure, Distributed Systems)

Full-Stack Software Developer with 7+ years of experience designing, developing, and deploying scalable enterprise applications using C#, .NET, Azure, and modern web technologies. Proven track record delivering cloud-native solutions, leading technical initiatives, optimizing system performance, and improving deployment reliability. Strong experience across the full SDLC, CI/CD pipelines, distributed integrations, and cloud infrastructure. Passionate about software architecture, DevOps automation, and mentoring developers to deliver high-quality systems.

CORE COMPETENCIES

- C#, .NET, ASP.NET Core, Web API, Entity Framework
- Azure (App Services, Functions, Storage, Azure DevOps, Application Insights)
- Microservices, Distributed Systems, REST APIs, Event-Driven Architectures
- SQL Server, MongoDB, MySQL, Database Design & Optimization
- CI/CD, Azure DevOps Pipelines, Release Automation
- JavaScript, TypeScript, React, HTML, SCSS
- Dynamics 365 Commerce, Optimizely, Shopify
- System Integration, API Design, Third-Party Integrations
- Agile/Scrum, Technical Leadership, Code Reviews
- DevOps, Cloud Deployment, Monitoring, Troubleshooting

PROFESSIONAL EXPERIENCE

Joseph Ribkoff | Full Stack Developer ***Montreal, Canada | April 2023 – Present***

Lead development and delivery of scalable enterprise commerce solutions using .NET, Azure, and Dynamics 365 Commerce platform supporting global retail operations.

Key Contributions & Impact:

- Designed and developed enterprise-grade commerce applications and extensions using C#, .NET, and Dynamics 365 Commerce SDK, improving platform extensibility and enabling new business capabilities.
- Built and deployed secure, scalable Azure-based applications and integrations using App Services, Azure Storage, and Azure DevOps pipelines, improving deployment reliability and reducing release efforts.
- Implemented custom Cloud Scale Unit (CSU) extensions enabling real-time integration between commerce platform and external services, improving transaction automation and operational efficiency.
- Integrated multiple enterprise systems including Klaviyo, Nuvei, Smarting, ParcelLab, and Google Analytics through secure REST APIs, improving marketing automation and payment processing workflows.
- Designed responsive, accessible user interfaces using JavaScript, SCSS, and modern frontend practices, improving usability and customer experience across global markets.
- Managed CI/CD pipelines using Azure DevOps, implementing automated builds, deployments, and monitoring, significantly improving release velocity and reducing deployment risks. Collaborated closely with architects, product owners, and business stakeholders to translate business requirements into scalable technical solutions.
- Troubleshot and resolve production performance issues, improving system reliability, and reducing incident resolution time.
- Monitor application health using Azure Application Insights and proactively resolve production issues improving uptime and stability
- Perform code reviews, enforce coding standards, and promote best practices improving code quality and team productivity

Byte Digital Inc — Software Developer ***Toronto, Canada | January 2021 – February 2023***

Delivered full-stack enterprise and commercial applications across multiple technology stacks including .NET, Azure, PHP, and JavaScript.

Key Contributions & Impact:

- Developed scalable web applications and backend services using .NET, C#, SQL Server, and Azure, supporting multiple client platforms and improving business automation.
- Designed REST APIs and backend services enabling integration between web applications, third-party services, and cloud infrastructure.
- Led end-to-end delivery of projects from architecture and development to deployment and production support.
- Implemented Azure cloud deployment solutions and CI/CD pipelines, reducing manual deployment effort, and improving release consistency.
- Improved application performance and reliability through database optimization, debugging, and performance tuning.
- Worked directly with stakeholders, designers, and product teams to deliver solutions aligned with business goals.
- Supported and optimized production systems, reducing downtime and improving application stability.

Dulcedo Management — Web Developer ***Montreal, Canada | July 2020 – January 2021***

Developed internal business systems and web applications to improve operational efficiency.

Key Contributions & Impact:

- Designed and developed a full-stack Office Management System using Laravel and React to manage the complete lifecycle of model scouting, recruitment, contracting, and profile management
- Architected backend REST APIs using Laravel enabling scalable and secure data management across business workflows
- Built responsive frontend interfaces using React, HTML, CSS, and Bootstrap improving usability and operational efficiency for internal staff
- Improved and modernized legacy company website by refactoring backend components, enhancing frontend performance, and improving maintainability

ITSD - Software Engineer ***Bangalore, India | June 2016 – October 2018***

Built and deployed enterprise applications and supported production systems.

Key Contributions & Impact:

- Designed and developed CRM systems for multiple clients using ASP.NET MVC, C#, SQL Server, and Azure, enabling efficient customer and business data management
- Built scalable backend systems and business logic layers supporting customer management, reporting, and workflow automation
- Developed frontend components using HTML, CSS, and JavaScript improving usability and user experience
- Created technical demos and proof-of-concepts for clients, supporting business acquisition and stakeholder alignment

EDUCATION

Bachelor of Engineering – Computer Science

Guru Nanak Dev University, India | 2012 – 2016

ACS – Computer Programming & Network Security

L'institut supérieur d'informatique ISI, Montreal, Canada | 2019 – 2021
