Experience

Joseph Ribkoff | Full Stack Developer Montreal | April 2023 - Present

- Delivered clean, scalable technical solutions across the full project lifecycle, from requirements gathering to deployment, ensuring high-quality and timely delivery.
- Built secure, responsive web applications and custom modules using Optimizely, Dynamics 365 Commerce SDK, Cloud Scale Unit (CSU) extensions, and integrations with third-party services like Klaviyo, Parcellab, Smartling, Nuvei, and Google Analytics.
- Implemented responsive UIs from design systems (e.g., Figma) with front-end technologies including HTML, SCSS, and JavaScript, ensuring consistency with branding and accessibility standards.
- Managed Azure infrastructure and applied Agile practices with Azure DevOps for branching, pipelines, CI/CD, and release management to optimize performance and streamline delivery.
- Partnered with consultants, architects, and ISVs to troubleshoot, debug, and optimize code, translating fashion retail processes into effective Commerce solutions.

Byte Digital Inc | Web Developer Toronto | January 2021 - February 2023

- Independently delivered high-quality code on time across diverse projects using the .NET stack, HTML, CSS, JavaScript, and Azure, covering all phases from requirements to deployment.
- Collaborated with internal teams, designers, users, and external ISVs for seamless code integration, review, and monitoring.
- Diagnosed and resolved deployment and production issues through thorough debugging and testing, ensuring smooth and reliable system operations.
- Contributed to the online success of small businesses by developing websites, enhancing lead generation, and improving sales and marketing strategies on platforms like Shopify, WordPress, etc.

Dulcedo Management | Intern Web Developer Montreal | July 2020 - January 2021

- Contributed to designing and developing full-stack applications using PHP, Laravel, and JavaScript, creating robust and scalable solutions.
- Enhanced customer profiles by gathering user information through Active API, improving data accuracy and user engagement.
- Ensured a seamless user experience across devices by thoroughly testing web pages on various viewports.
- Developed an end-to-end office management solution, streamlining daily tasks and improving operational efficiency for the company.

IT Support Desk | Software Development and Deployment Engineer. Bangalore, India | June 2016 - October 2018

- Actively involved in designing and developing full-stack applications, contributing to their robustness and scalability.
- Assisted in the implementation of one or more releases into production, gaining hands-on experience in deployment processes.
- Provided technical support to end users, addressing their concerns and challenges, and recommending effective solutions to enhance user experience.
- Participated in the deployment and setup of applications in hosting server environments, gaining exposure to deployment workflows.
